

TITLE

ADHESIVE COMPOSITIONS BASED ON BLENDS OF GRAFTED
SUBSTANTIALLY LINEAR POLYETHYLENES AND NON-GRAFTED
CONVENTIONAL POLYETHYLENES

5

ABSTRACT OF THE INVENTION

Laminated films comprising at least one structural layer, at least one adhesive layer and optionally at least one barrier layer made by a high speed or fast quench film process, where the adhesive compositions are blends of acid-grafted substantially linear polyethylenes and conventional-linear polyethylene homopolymer or
10 copolymer or low density polyethylene.
